

*Solutions that make a difference*

LANTech is a wholly owned East African Company, which was established in Kenya since 1993. Our core business is Information Communication Technology (ICT) System Integration. Our fundamental objective is to deliver round-the-clock business solutions for our customers by merging best of breed technologies with a highly skilled workforce.

## TOTAL INTEGRATED SOLUTIONS

We have gained a strong regional base by opening a branch in Uganda. This offers us a competitive edge given that the Kenyan office focuses on the Sudan, Ethiopia, Tanzania and Eritrea region therefore allowing the Ugandan office the opportunity to cover the Rwanda, Burundi and Central African Region.

LANTech is a Cisco Premier Certified Partner with specializations such as Cisco Advanced Security, Unified Communication, Advanced Routing and Switching, Express Foundation and most recently Advanced Technology Partner in Identity Services Engine, making us the only partner in East Africa with the capability to design, implement and maintain programs in the CISCO Trusec Identity. We are also Microsoft Certified Partners, EMC Partners, VMware Certified Partners, Dell Certified Partners, Oracle Gold Partners and Simeon Certified Installers.

With the current trend towards Data, Voice and Video Integration, LANTech has developed skills to enable the integration of these and other technologies to provide unique and innovative solutions that meet the specific customer's needs. This utilizes the existing infrastructure investment; enables centralized management and streamlines business processes facilitating an optimized collaborative environment incorporating Document and Workflow Management.

LANTech has consistently deployed world class solutions to organizations thereby ensuring greater network security, cost-effective network management that allows seamless growth, enables and supports employee mobility allowing them to cope and compete in an always-on, always-connected business environment. These empowered organizations produce high-value work more efficiently, arrive at business-critical insights, spread best-practices, forge better relationships with customers and partners and effectively manage unexpected situations as business conditions change.
